Automatically create Auction Ads that really hit potential bidders between the eyes without ANY programming! Auction-O-Matic is the only eBay template software that I need... it does everything for me. it generates everything I need to create great eye-catching, bid pulling auction listings and saves me so much time.. Thank You..." Rick Norris - (eBay seller) handcraftedmodelships Before I tell you about Auction-O-Matic and how it can quickly help you to increase your Auction Profits. Let me briefly explain how and why I developed this neat little program: A few years back when I started selling on eBay I couldn't help but wonder why some very similar auction items to the things I was listing, would always receive more bids than my own - Pushing up the winning bid price for the other guy's auction! Why do some identical items end with higher winning bids? It took me ages to figure it out. I mean, I always used photo's and detailed descriptions - just like everyone else after all... I spent weeks eliminating one thing at a time doing little systematic 'tests' to compare the differences between; The length of an auction, The starting price, Not using a reserve etc., etc. Then FINALLY late one night I worked it out!... You'll be surprised to learn that it wasn't any the things I had first been thinking of at all. The Ads just look professional! It's because the ads that pull the most bids at auction are professionally formatted using "HTML" coding to make the advert even more 'eye catching' than a standard listing and in some cases even use a complicated "Javascript" to make the advert interactive - with new windows that popped open upon request! I didn't know how to do any of this clever stuff, do you? During the evenings of the months that followed, I decided to teach myself everything I could learn about HTML and Javascript programming. So that I would be able to get ahead of the rest of the crowd, and post the best adverts possible - full of little auction secrets. My hard work eventually paid off and I put everything I had learnt into one very simple 'step-by-step' system that automatically generates all the HTML and JavaScript required to create a great looking, bid pulling interactive auction advert. This system has now been turned into I proper auction tool I have called Auction-O-Matic! Auction-O-Matic is now available for instant download! There's no need for you to learn programming like I had to because Auction-O-Matic does all the hard work for you. In fact, because of this software there's no need for you to know anything about

HTML or JavaScript at all. Auction-O-Matic produces great results but also saves you time preparing your advert for submission. Because of the simple way everything is laid out, it only takes you a couple of minutes from start to finish. The end result is a stunning interactive auction advert - even if you're a complete beginner. Nearly everything is done automatically for you, in fact all you need to do is 'fill-in-the-blanks' as instructed. Auction-O-Matic Works With All Online Auction Sites Including eBay Automatically generates all the HTML and Javascript coding by itself! Automatically creates interactive pop up windows for 6 more 'super-size' photo's you have uploaded to the Internet. Automatically displays your company logo which you have uploaded to the Internet Automatically aligns and frames your logo's and photo's to make them stand out. Automatically changes the paragraph alignment, font colors, font faces, font cases for every area of your listing. Automatically "copies" all of the code generated to your computers clip board so all you need to do is "paste" the code into eBay (or any other online auction site) Automatically allows to you to preview your finished advert before submission in a browser window so you can check everything looks just right. And there's more... However, like I say I am currently 'price testing' so if you want to be sure of downloading Auction-O-Matic at the minimum price I would advise you not to hang about. Many of my online friends have suggested that $34.95 this is too low, and I should be thinking nearer $50.00.
