Details: Magnetic is a music /environmental CD set in northern Canada and Alaska. It is the second of the music /environmental series - the first "Over My head " , the third "Antarctica" and the fourth CD "Machine Works" . This CD began in 1984 when I was asked to be an artistic observer on a scientific expedition to the Chukchi Sea - north of the Bering Strait , to study the feeding habits of gray whales and walrus. I got my diving license and worked with the scientists collecting samples . In off hours I collected many sounds from the north . Over the next five years , I continued these expeditions and chasing the north. The CD was released in 1990 and was nominated for Juno Award in the pop instrumental category the following year.
