

Mp3 Logic Probe - Electronic: Experimental

[DOWNLOAD HERE](#)

Dark and distorted illbient electronic. 7 MP3 Songs ELECTRONIC: Experimental, ELECTRONIC: Illbient
Details: Logic Probe is Derek and Dave. They are super radical guys that play electronic music in Seattle. Early on, using beat-up records, yard sale keyboards and effects pedals, Logic Probe laid the groundwork for their sound. Over the years their equipment lineup has steadily evolved from samplers and keyboards to laptop computers, but their off-beat musical vision has remained intact, never shying away from unexplored territory. Logic Probe has completed soundtrack work for several independent films, self-produced three full-length albums, remixed songs for bands such as Botch, Waxwing, and Obelus, and played shows all over the NW United States and Utah. Their influences range from punk, industrial, rock, metal, eighties pop, ambient, and abstract electronic. Have you ever wanted to make something sound like ba-donka-donka and it ended up sounding like it went boop-beep-ba-dacka-lacka-chik-a-chik? Well, that is the Logic Probe philosophy in a nutshell-hence the name-Logic Probe. Buy-0-the-music!
