Now you can have this great experience right on your TV screen anytime! Bass, chords, melodies and leads all at once. Hey-is that popcorn I smell in the microwave? BIO: Michael Kollwitz has been playing The Chapman Stick * since 1976 and was one of inventor Emmett Chapman's first music students. He studied with Chapman for 10 years and is considered one of the worlds top Stickists. He began playing the revolutionary stringed instrument after witnessing a live performance given by Chapman in Southern California. After years of practice and study, in the early 80s he began his own performance career. Since that time, he has performed extensively throughout the Southwestern US and has given well over a

thousand performances at virtually every type of venue. He has been an opening act for The Beach Boys, offered full-time work at Disneyland and has an extensive client list that includes everything from Fortune 500 companies to civic organizations. He has performed at festivals, fairs, upscale resorts, fine dining establishments, weddings and many other venues. He has been (and continues to be) featured on numerous TV and radio stations in the western US and nationwide, including All Things Considered on PBS. He has been featured in many newspapers, magazines and other media. His music was selected for inclusion in the very first CD compilation of Stick music and his photo can be found in the first Stick instruction book, Free Hands. In May 2007, CurrentTV purchased the rights to one of his videos for national broadcast. He has had nine (9) independent releases: 7 audio CDs, a Live In Concert DVD (10/06) and the worlds first Chapman Stick digital download album (which is currently offered on 38 different sites). Waterfallin (05/06) is his most recent audio CD release. It is the first-ever CD to prominently feature the new higher-range Alto Stick developed by Chapman in 2005. His other releases are: Steppin Out (01/00), Moments (03/03), Carnival (12/03), Memories (05/04), Frosty The Stickman (12/04) and Here Comes Spring (05/05). Although he has an extensive repertoire, his music has been described as a relaxing blend of jazz and blues. The Stick has a very unique, pleasant tone that seems to relax listeners. The sweet, soothing tones of the instrument are said to simply melt away the stress of the day. He resides in Lahaina on the island of Maui in the State of Hawaii and travels extensively to perform at festivals and fairs in the Western US. * The Chapman Stick is easily the most radical innovation in stringed instruments since the invention of the electric guitar. The Stick is played with both hands; simultaneously playing BOTH bass and melody parts independently- by tapping and holding strings to frets (rather than by pluck or strum) The essence of guitar, bass, keyboards and drums- all into one instrument! For a talented player, these capabilities allow The Stick to sound like 2 or 3 musicians at once.
