Breakbeat/Breaks, ELECTRONIC: Funk People who are interested in BT should consider this download.

Details: The FITTEST Original Soundtrack is a true tribute to classic video game music, featuring twelve full musical tracks in a wide range of musical styles influenced by such games as Turrican, Mega Man,

Donkey Kong Country, Contra and Dance Dance Revolution. Throughout the highly melodic score, zircon

(Andrew Aversa) expands beyond the realm of his previous breakbeat and trance albums with tracks like

Morsecode (uptempo electro-funk), Fusion Master (80s synth pop in the style of Michael Jackson), Star

Command (over-the-top rock/metal), and Psychesphere (psychedelic, sitar-laden grooves.) Of course,

theres still plenty of electronica to go around. zircons trademark technique of combining organic, acoustic

instruments with enormous beats and deep synths can be found in many of the tracks like the

micro-dance tune Cellular and the BT-inspired Photosynthesis. Even the startup logo sound effects and

menu music were included (all designed by zircon), with every track carefully edited, looped and

mastered for your listening pleasure. So, if youre a fan of video game music and arrangements, or even if

youre one to just linger on a stage for a few more seconds to hear the BGM loop, this is your jam. ---

FITTEST, a head-to-head and co-operative arena space shooter produced by Blue Door Productions and

Rebel Dwarf, is slated for release on Xbox 360 Live Arcade on the Community Games network in Q2

2009. Check out a gameplay trailer at YouTube: youtube.com/watch?v=NI3toAf6dFo
