

Liver Metastasis: Biology And Clinical Management

[DOWNLOAD HERE](#)

BIOLOGY. 1. Cellular and molecular aspects of the liver architecture and function. 2. The tumor microenvironment at different stage of hepatic metastasis. 3. The Colorectal Cancer Initiating Cell: Markers and their role of in liver metastasis. 4. Role of CXC chemokines and receptors in liver metastasis impact on liver resection-induced engraftment and tumor growth. 5. Role of Inflammation in the early stages of liver metastasis. 6. Signal transduction in tumor-endothelial cell communication. 7. Tumor dormancy in liver metastasis: clinical and experimental evidence and implications for treatment. 8. Role of the IGF- axis in liver metastasis: experimental and clinical evidence. 9. Breast Cancer Liver Metastasis. CLINICAL MANAGEMENT.10. Imaging of Hepatic Metastases. 11. Colorectal Carcinoma Liver Metastasis: Surgical Clinical Perspective. 12. Evaluation and Management of Liver Metastases from Non-Gastrointestinal Cancer. 13. Proteomic profiling of hepatic metastases: Paving the way to individualized therapy. 14. Targeting Angiogenesis in the Treatment of Hepatic Metastasis. 15. Uveal melanoma a paradigm of site-specific liver metastasis. EAN/ISBN : 9789400702929 Publisher(s): Springer, Berlin, Springer Science & Business Media Discussed keywords: Leberkrebs, Metastasen Format: ePub/PDF Author(s): Brodt, Pnina
