Sound is different, more alternative. Play to peoples feelings and emotions. An Easy listening style. 9 MP3 Songs EASY LISTENING: Mood Music, POP: New Wave Details: I am George. About five years ago I met Tyrone Harding. We became close friends and we loved music. It all begin as a fun hobby to play cover tunes, practice, and more practice. Within a couple of months after Tyrone and I met, he brought along another friend - Henry Jordan. I learned taht Henry loves to write. The rest is history, we went from cover tunes to writing our own songs and I would put the music to it. Before our writing history we housed some shows at my home and friends would come and listen to us play. One Saturday night we housed a show and had to play two shows, the room could only hold 35 people comfortable. We had over 70 to show and had to make a second time slot for some of them to come back. The first show was over by 8pm and we started the next show at 8:30pm. We had on agenda of 22 songs, from Elvis, Beatles, Elton John, and others. That was a fun time. Well, we progressed to writing our own and now want to share what we have to the public. We feel this is timely material and that many people could relate to our songs. We called ourselves NightOwls at first but then it came back that it sounds like a fifties band. So, we went through several different ideas and someone mentioned NOA. I personally did not want to get away from NightOwls, for that described us to a tee. So, NOA meaning Nite Owl Authentics feels better. For we want to be original, unique in style and not have a common groove or feel but mix it up. That's us. When you listen to our songs and music, you can feel the emotion. We are working hard to be unique according to the art. We hope you give us a second for your heart and ear. Listen to our art and see if you can feel the emotion from the picture we are trying to paint with our music and words. Thank you so much for your time and I hope you enjoy the sound. Thanks again, from your favorite Nite Owl, George.
