

Numerical Methods For Structured Matrices And Applications

[DOWNLOAD HERE](#)

1;Title Page;3 2;Copyright Page;4 3;Table of Contents;5 4;Foreword;7 5;Part I Georg Heinig;9 6;Georg Heinig (1947 2005) In Memoriam;10 7;Georg Heinig November 24, 1947 May 10, 2005 A Personal Memoir and Appreciation;14 7.1;References;19 7.2;List of Georg Heinig s (refereed) publications;19 8;Introduction to Bezoutians;31 8.1;Foreword;31 8.2;1. Preliminaries;36 8.2.1;1. Notation.;36 8.2.2;2. Sylvester s inertia law.;37 8.2.3;3. Toeplitz, Hankel, and Toeplitz-plus-Hankel matrices.;37 8.2.4;4. Quasi-Toeplitz matrices, quasi-Hankel matrices, and quasi-T+H matrices.;38 8.2.5;5. Mobius transformations.;39 8.3;2. Definitions and properties for the Hankel and Toeplitz case;41 8.3.1;1. Hankel Bezoutians.;41 8.3.2;2. The transformation .H.;44 8.3.3;3. Uniqueness.;44 8.3.4;4. Quasi-H-Bezoutians.;45 8.3.5;5. Frobenius-Fischer transformations.;46 8.3.6;6. Splitting of H-Bezoutians.;46 8.3.7;7. Toeplitz Bezoutians.;47 8.3.8;8. The transformation .T .;49 8.3.9;9. Symmetric and skewsymmetric T-Bezoutians.;49 8.3.10;10. Hermitian T-Bezoutians.;50 8.3.11;11. Splitting of symmetric T-Bezoutians.;51 8.3.12;12. Relations between H- and T-Bezoutians.;53 8.4;3. Resultant matrices and matrix representations of Bezoutians;54 8.4.1;1. Kravitsky-Russakovsky formulas.;54 8.4.2;2. Matrix representations of Bezoutians.;55 8.4.3;3. Bezoutians as Schur complements.;56 8.5;4. Inverses of Hankel and Toeplitz matrices;57 8.5.1;1. Inverses of Hankel matrices.;57 8.5.2;2. Characterization of fundamental systems.;59 8.5.3;3. Christoffel-Darboux formula.;59 8.5.4;4. Inverses of Toeplitz matrices.;59 8.5.5;5. Characterization of fundamental systems.;60 8.5.6;6. Inverses of symmetric Toeplitz matrices.;62 8.5.7;7. Inverses of skewsymmetric Toeplitz matrices.;63 8.5.8;8. Inverses of Hermitian Toeplitz matrices.;64 8.5.9;9. Solution of systems.;65 8.6;5. Generalized triangular factorizations of Bezoutians;65 8.6.1;1. Division with remainder.;65 8.6.2;2. Factorization step for H-Bezoutians.;65 8.6.3;3. Euclidian algorithm.;66 8.6.4;4. Generalized UL-factorization of H-Bezoutians.;66 8.6.5;5. Inertia computation.;67 8.6.6;6. Factorization step for T-Bezoutians in the generic case.;67 8.6.7;7. LU-factorization of T-Bezoutians.;68 8.6.8;8. Non-generic case for T-Bezoutians.;69 8.6.9;9. Hermitian T-Bezoutians.;70 8.7;6. Bezoutians and companion matrices;71

8.7.1;1. Factorization of the companion.;71 8.7.2;2. Functional calculus.;72 8.7.3;3. Barnett s formula.;73 8.7.4;4. Barnett s formula for T-Bezoutians.;73 8.8;7. Hankel matrices generated by rational functions;74 8.8.1;1. Generating functions of Hankel matrices.;74 8.8.2;2. Vandermonde factorization of Hankel matrices.;77 8.8.3;3.Real Hankel matrices.;78 8.8.4;4. The Cauchy index.;79 8.8.5;5. Congruence to H-Bezoutians.;80 8.8.6;6. Inverses of H-Bezoutians.;82 8.8.7;7. Solving the Bezout equation.;82 8.9;8. Toeplitz matrices generated by rational functions;83 8.9.1;1. Generating functions of Toeplitz matrices.;83 8.9.2;2. Matrices with symmetry properties.;85 8.9.3;3. Vandermonde factorization of nonsingular Toeplitz matrices.;86 8.9.4;4. Hermitian Toeplitz matrices.;87 8.9.5;5. Signature and Cauchy index.;87 8.9.6;6. Congruence to T-Bezoutians.;88 8.9.7;7. Inverses of T-Bezoutians.;89 8.9.8;8. Relations between Toeplitz and Hankel matrices.;90 8.10;9. Vandermonde reduction of Bezoutians;90 8.10.1;1. Non-confluent Hankel case.;91 8.10.2;2. Non-confluent Toeplitz case.;92 8.10.3;3. Confluent case.;93 8.11;10. Root localization problems;95 8.11.1;1. Inertia of polynomials.;95 8.11.2;2. Inertia with respect to the real line.;95 8.11.3;3. Real roots of real polynomials.;97 8.11.4;4. Inertia with respect to the imaginary axis.;98 8.11.5;5. Roots on the imaginary axis and positive real roots of real polynomials.;99 8.11.6;6. Inertia with respect to the unit circle.;100 8.11.7;7. Roots of conjugate-symmetric polynomials.;101 8.12;11. Toeplitz EAN/ISBN : 9783764389963 Publisher(s): Springer, Berlin, Birkhuser Format: ePub/PDF Author(s): Bini, Dario Andrea - Mehrmann, Volker - Olshevsky, Vadim - Tyrtyshnikov, Eugene - Barel, Marc van
