Limited Offer! Every Copy Receives Master Resell Rights! Now You Can Profit 100 Selling This Product...

"Who Else Wants to Discover How to Create Profit-Generating Info-Products WITHOUT Creating the Actual Product Using these 10 Tested and Proven Ways For Creating Passive Income Businesses..."

Give Me Just 42 Minutes and I'll Tell You How To Create Your Own Products From Scratch - Even if You're a Beginner - I've Created Over 25 Products In Less Than Two Years - and I'm Revealing How You Can Do it Too...Want To Be Next?... I get dozens of emails from subscribers and customers who all have similar problems, like: * How can I make money fast? * I want to make money but I don't have much * I bought tons of courses and I'm still not making money * I'm a beginner, so where do I start? * Is there an easy way to make money online? * + many more emails like these. Does this sound familiar? There's no "magic pill" or key to success. But what I've found is that most successful businesses have one thing in common - they all have a product or service to offer. Look at Microsoft, Robert Kiyosaki, car companies, Nike and the list goes on. Common sense, right? I know you're intelligent enough to know that. By having your own product, you'll experience a more profitable, scalable and stabled business. Every "guru" knows

that. As you read every word of this letter, you'll be amazed at how truly profitable it can be to have your very own winning product that sells. Wouldn't it be amazing if you had something you could call your own and be able to sell over and over again? What If You Don't Have a Product? To give you an example of what can happen if you have no product, I'll tell you a story about a friend of mine. Let's call him John. ** Real Life Case Study ** John makes a killing online. \$1000, \$3000, even \$10,000 a day. That's how much he makes. Don't get me wrong here: his tactic is great for making quick cash, but not for long-term success. This type of business also requires you to monitor all the time, so it's not something you can "set and forget" To be brutally point-blank with you here, John lost over 75% of his revenue, literally overnight. So what is he doing? He's doing 100 Google Adwords Arbitrage. Basically it's like buying something for \$1 and selling it for \$2. You bid on keywords to promote other people's products. Let me ask you: If you could spend \$100 on advertising and get a \$200 return on investment, would you do it? Of course you would. But what happens if Google, one day, jumps your campaign from \$1 per click to \$5 a click? You wouldn't notice the change until you've actually checked your account to see that you owe a ton of money to Google. John was affected by, what we call, the Google slap. This is when Google Adwords makes adjustments where they penalize advertisers who have landing pages with little or poor content. In cases like this, advertisers will suddenly experience higher minimum bids. The bottom line is -- you can't rely 100% of your efforts on one thing, especially something you can't control. To ensure that you have total flexibility and control, you need your own product. Are you beginning to see how important it is to have your own product? But Here's Where The Problem Strikes... You don't know how to create a product You hate the pain and thought of writing There's too much garbage and fluffed up guides out there You hate putting the pieces of puzzles together just to get one simple thing done You tend to procrastinate when it comes to creating your products You want to learn the easiest and fastest way to create your own product Why Should You Believe Me? I don't want to brag or boast my ego, but here's something you should know - I've created over 25 products in less than two years - reports, ebook, video tutorials, graphics packages, home study courses, resell rights products and more. I must admit, some of the products couldn't even make a couple of sales, while others sold over 2100 copies in its first few weeks of launch (e.g. - CopyAndPasteGraphics2.com). Some marketers believe that if your product doesn't sell either 1) Give it away for free/sell rights or 2) throw it away/remove it from your site completely. Some don't believe that "the more products you have, the more you'll make". I believe that if you've crafted a product that

people need, you'll surely add a great source of income to your bottom-line. ...and hey, the more products you have, the more offers you can make. When you have multiple products, you'll have multiple streams of income. You can package all your products and sell them as one big course and at a higher price (\$97 - \$997) You can create a "themed" package to give your package a more focused edge. How Can You Get Started Right Here, Right Now? The process of creating your own products can be daunting, especially if you find it difficult to communicate and deliver your point. But luckily, I've made the job easier for you. I've created a practical guide on how to create your own info-products without doing the creation process yourself. This guide details the exact methods I use to create my own products on the fly. Let me introduce to you... - Special Report - Unstoppable Product Creation Tags: plr
