

Web 2.0 Covers V3 - Stunning E-covers Without Photoshop!

[DOWNLOAD HERE](#)

Comes with two UNANNOUNCED BONUSSES! Easily Create Stunning Covers In Minutes, WITHOUT Photoshop! The basic idea behind Web 2.0 covers is this... It's a template based system. You get 10 different templates, for 10 different eCover types: So you get 1 template for each cover. What makes these templates special is: -Each template has a flat and straight front cover, so you can just type your text into the template without tilting and distorting the text in any way. Very easy to use. -Each template also has some 3D elements to give it a 3D look. These 3D elements are already part of the template so you don't need to do anything extra. The 3D "look" is already there, so you don't need any other software or action scripts; this means that you don't need Photoshop (but you can use Photoshop if you want to). -Each template comes pre-installed with 25 different "effects" that will spice up your cover. And all you have to do is check or uncheck the effect you want. This makes creating an eye catching cover super easy. -Each template also comes pre-installed with 11 different "shapes" like half circles, bars, rectangles, etc. So you can break up your cover into sections and add some more eye candy to the cover easily. -Each template is highly customizable, and each part of the template comes on its own layer that you can

customize in pretty much any way you want. Mix and match the effects, resize and distort anything you want, change colors, etc. So with each template, you can create literally thousands of different combinations of covers. So your cover won't look like all the other covers out there that are using these templates. -The main thing that makes this product different from all the other ones, is that others only turn your cover from flat to 3D, and you still have to create the main design itself yourself, from scratch. Web 2.0 Covers on the other hand, comes pre-installed with all the cool effects and elements you need to create the initial design, all you have to do is click a few buttons and check off a few boxes. So with this product you can create not only 3D covers, but also professional looking initial design for those 3D covers. These templates are extremely flexible. With them you can easily create pretty much an unlimited amount of quality looking covers, in minutes. I don't think it can get much easier than this. Here's exactly what you will get in this package: * 10 templates (in layered PSD format). * 25 pre-installed effects on each template. * 10 pre-installed shapes on each template. * Easy to follow step-by-step instructions.

Quick FAQ: Q. Where is the difference between Web 2.0 Covers V2 and Web 2.0 Covers V3? A. Web 2.0 Covers V3 is more polished and overall better and easier to use. Specifically, the V3 covers are sharper, more detailed, more realistic looking, and more polished. Q. Do I need any special software? A. You need a software program that opens PSD (Photoshop files). I would recommend either Adobe Photoshop or Photoshop Elements. However, you can also use any other program that opens PSD files. You can use a good free program called GIMP. Q. How is this different from other eCover software? A. Most other eCover products are either a stand alone software, a set of Photoshop action scripts, or flat JPEG templates. Web 2.0 Covers isn't any of those things. It's a set of highly customizable layered templates. Q. Is this easy to use? A. Yes, very easy. The templates come pre-installed with all the "special effects". So all you have to do is check and uncheck some boxes, and you have a nice looking cover. Just add text and you're ready to go.

BONUSES: BONUS#1: 21 Header Graphics Templates - FULLY Customizable!
(PLR): This package contains 21 header templates in .PSD format and .JPEG format (blank), plus 21 sample templates in .JPEG format. These 21 headers are FULLY Customizable! **BONUS#2: To make the deal even sweeter for you, we are even including two unannounced bonuses with it!
