

# Links Between Geological Processes, Microbial Activities&evolution Of Life

[DOWNLOAD HERE](#)

Preface. - Acknowledgements. - Contributors. - 1. Oceanic pillow lavas and hyaloclastites as habitats for microbial life through time - a review; H. Furnes et al. - 2. Microbial colonization of various habitable niches during alteration of oceanic crust; M. Ivarsson, N.G. Holm. - 3. Ambient inclusion trails: their recognition, age range and applicability to early life on earth; D. Wacey et al. - 4. Spatial distribution of the seafloor life: diversity of biogeography; F. Inagaki, S. Nakagawa. - 5. Analysis of deep subsurface microbial communities by functional genes and genomics; A. Teske, J. Biddle. - 6. Diversity of Bahamian stromatolite substrates; R. Ginsburg, N. Planavsky.- 7. Evaporite microbial films, mats, microbialites, and stromatolites; R. Brigmon et al. - 8. Microbial life in extreme environments: linking geological and microbial processes; H. Dong. - 9. Marine methane biochemistry of the Black Sea: a review; T. Pape et al. - 10. From volcanic winter to snowball earth: an alternative explanation for neoproterozoic biosphere stress; R.J. Stern et al. - Subject index. EAN/ISBN : 9781402083068 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Dilek, Yildirim - Furnes, Harald - Muehlenbachs, Karlis
