Old-school, raw industrial with hints of ambient and atmospheric electronica. 8 MP3 Songs

ELECTRONIC: Industrial, ELECTRONIC: Ambient Details: Dissent is a project from the mid-nineties -- a collage of industrial and ambient landscapes. All songs were written, produced, and performed by Kito D. Mann. Dissent started as a project while Kito was in college, with access to a computer music studio at the Peabody Conservatory in Baltimore, MD. The original set of songs that comprise this CD, haven, are the result of late nights spent in that studio. Influences include X Marks the Pedwalk, Skinny Puppy, Nitzer Ebb, NIN, KMFDM, Aphex Twin, and Autechre. Two of the songs -- the title track "haven", and the catchy industrial remnant "cement" also have video counterparts. Kito is currently working on new material.
