

Mp3 Secondarycell - Interconnected

[DOWNLOAD HERE](#)

Minimal techno pieces interspersed with ambient/drone sections in one continuous flow. 14 MP3 Songs in this album (42:59) ! Related styles: ELECTRONIC: Minimal Techno, ELECTRONIC: Ambient People who are interested in Bola Boards of Canada Tipper should consider this download. Details: My third album "Interconnected" is a bit of a departure from the styles on my first two releases. Previously I made a conscious decision to avoid heading into techno and trance territory, and I also had not experimented very much with ambient textures. With Interconnected I decided "anything goes" and the result is a 43 minute roller coaster ride of continuously flowing music. Although designed to be listened to as a whole piece the album is divided into seven minimal techno/trance, beat-driven sections interspersed with another seven shorter ambient/drone compositions. The physical CD will contain the fourteen track markers so skipping around is possible. However, for maximum effect the listener should set aside 43 minutes of their time and take the trip by playing the disc in its entirety. This release also follows a theme via the loose association of several extended samples of dialog. Basically, Interconnected is an observation on how science and technology have effected our modern culture. All of the tracks on Interconnected are in the order that they came to me, and I realize it may be an antiquated concept to ask someone to devote almost 45 minutes of their time to listen to an album all in one go. Still, after much thought I have decided to make the release available as one unbroken piece of music... even in this age of fast cuts and instant gratification. Interconnected will be appearing on iTunes within the next couple of weeks, and of course you may download it here on CD Baby right now. If you decide to go for the digital download please set your player to gapless playback for the intended experience. -SC
