

Mp3 William Verkler - Redemption

[DOWNLOAD HERE](#)

Electronic Symphonic Music. Dynamic Orchestra. Erie, but upbeat background music for Movie Making, including some light sound effects. 11 MP3 Songs EASY LISTENING: Orchestral, ELECTRONIC: Virtual Orchestra Show all album songs: Redemption Songs Details: I like providing Music and Sound Effects to Movie makers. I can come up with what they request or compose for them what I think they require based on their defined needs. I just run with the direction that the music takes me. Sometimes I know exactly what is required, and other times I accidentally come up with something very unique and entertaining. I have a lot of musical tools. My latest acquisition is a MicroKorg Vocoder. My mainstay keyboards are made by the Roland company. I use a Roland Handsonic drum machine as well. I have a Yamaha DD-6 and a DD20C drum machine that I run through a Roland BOSS Guitar and Bass Guitar enhancer to produce some very unusual beats. My drum room has a lot of toys for producing very intense beats. When I am in the mood to do the work and have a good idea of what is required I begin to work on one track until I get it right then on to the rest. I use a Tascam 8 track digital recorder along with a 1604 Mackie mixer. There is a lot of other stuff to make the music come out very Dynamic and Entertaining. I have a good ear for music, I like Movies, and I know what makes them Better...
