

# Plants And Climate Change

[DOWNLOAD HERE](#)

Global climate change: atmospheric CO<sub>2</sub> enrichment, global warming and stratospheric ozone depletion.

1. Responses of terrestrial Antarctic ecosystems to climate change; P. Convey, R. Lewis Smith.- Atmospheric CO<sub>2</sub> enrichment.
  2. Vascular plant responses to elevated CO<sub>2</sub> in a temperate lowland Sphagnum peatland; R. Milla et al.-
  3. Moss responses to elevated CO<sub>2</sub> and variation in hydrology in a temperate lowland peatland; S. Toet et al.-
  4. From transient to steady-state response of ecosystems to atmospheric CO<sub>2</sub>-enrichment and global climate change: conceptual challenges and need for an integrated approach; L. Rustad.-
  5. Plant performance in a warmer world: general responses of plants from cold, northern biomes and the importance of winter and spring events; R. Aerts et al.- Global warming.
  6. Stable isotope ratios as a tool for assessing changes in carbon and nutrient sources in Antarctic terrestrial ecosystems; A. Huiskes et al.-
  7. Upscaling regional emissions of greenhouse gases from rice cultivation: methods and sources of uncertainty; P. Verburg et al.- Stratospheric ozone depletion.
  8. Effects of enhanced UV-B radiation on nitrogen fixation in arctic ecosystems; B. Solheim et al.-
  9. Stratospheric ozone depletion: high arctic tundra plant growth on Svalbard is not affected by enhanced UV-B after 7 years of UV-B supplementation in the field; J. Rozema et al.-
  10. Outdoor studies on the effects of solar UV-B on bryophytes: overview and methodology; P. Boelen et al.- Reconstruction of Past Climates using plant derived proxies.
  11. A vegetation, climate and environment reconstruction based on palynological analyses of high arctic tundra peat cores (5000-6000 years BP) from Svalbard; J. Rozema et al.-
  12. Physiognomic and chemical characters in wood as Palaeoclimate proxies; I. Poole, P. van Bergen.-
  13. The occurrence of p-coumaric acid and ferulic acid in fossil plant materials and their use as UV-proxy; P. Blokker et al.-
  14. Biomacromolecules of algae and plants and their fossil analogues; J. de Leeuw et al.-
- EAN/ISBN : 9781402044434 Publisher(s): Springer Netherlands Format: ePub/PDF  
Author(s): Rozema, Jelte - Aerts, Rien - Cornelissen, Hans
