

Biological And Artificial Intelligence Environments

[DOWNLOAD HERE](#)

From the contents: Pre-WIRN workshop on Computational Intelligence Methods for Bioinformatics and Biostatistics (CIBB): 1 ProGenGrid: A Grid Framework for Bioinformatics.- 2 A preliminary investigation on connecting genotype to oral cancer development through XCS.- 3 Mass Spectrometry Data Analysis for Early Detection of Inherited Breast Cancer.- 4 Feature Selection combined with random subspace ensemble for gene expression based diagnosis of malignancies.- 5 Pruning the Nodule Candidate Set in Postero Anterior Chest Radiographs.- 6 Protein Structure Assembly from Knowledge of beta-sheet Motifs and Secondary Structure.- 7 Analysis of Oligonucleotide Microarray Images using a fuzzy sets Approach in HLA Typing.- 8 Combinatorial and Machine Learning Approaches in Clustering Microarray Data.- 9 Gene expression data modelling and validation of gene selection methods.- 10 Mining Yeast Gene Microarray Data with Latent Variable Models.- 11 Recent Applications of Neural Networks in Bioinformatics.- 12 An Algorithm for Reducing the Number of Support Vectors.- Pre-WIRN workshop on Computational Intelligence on Hardware: Algorithms.- Implementations and Applications (CIHAIA): 13 Genetic Design of linear block error-correcting codes.- 14 Neural hardware based on kernel methods for industrial and scientific applications.- 15 Statistical Learning for Parton Identification.- 16 Time-Varying Signals Classification Using a Liquid State Machine.- 17 FPGA Based Statistical Data Mining Processor.- 18 Neural Classification of HEP Experimental Data.- WIRN Regular Sessions- Architectures and Algorithms; Models; Applications. EAN/ISBN : 9781402034329 Publisher(s): Springer Netherlands Discussed keywords: Künstliche Intelligenz Format: ePub/PDF Author(s): Apolloni, Bruno - Marinaro, Maria - Tagliaferri, Roberto
