BIG ROB is a self-contained production company, writing, producing, performing and mixing his original music. Being frustrated time after time by mediocre sound engineering and production he pursued his own visions as producer, artist, and engineer. Knowing that going into a recording contract as just an artist would lead to certain failure, he decided to take his time and build his own production company. In 1994 he recorded and sold over four hundred copies of his cassette single entitled "Shake". After finding that retail record outlets were asking for a full album, he began revamping his entire recording process in order to meet the demand. It's taken a while but he is now able to produce recordings comparable in quality to that of major labels. Rob has worked musically with artist from the Gap Band to Charlie Pride. Rob is currently promoting his new EP cd entitled "The Intro" that contains the #1 downloaded jam on the MP3Old School Chart for 5 straight days in July 2003.
