This CD has soft nature and ocean sounds that connect the pieces. This CD is great for shutting down and really relaxing or soft background for dinner. We don't recommend that you drive with this CD on, it may zap you (unless you're in stressful traffic). What sets these CDs apart from all others... THEY ARE AN EXPERIENCE. Thousands have their favorite artists. Be it a live performance or from a friend, once people hear these CDs they are right up there at the top of their list. "The "Moments of Peace" series is a unique approach to composition where keyboard and synthesizer strings are performed simultaneously, creating a full orchestral sound with the piano. There is a synergy between the two keyboards which Charles believes cannot be captured by recording them separately. The CDs are Beautiful and Relaxing, and leave you with the feeling of peace.
