

Mp3 Cri-one Aka Chris Brown - Sampler

[DOWNLOAD HERE](#)

various techno 18 MP3 Songs ELECTRONIC: Dance, ELECTRONIC: Techno Details: House music is really unsaturated disco. Every body knows that. But a few long years there is now micro house really small samples and clicks and glitches seems cool, then there is jungle which is really fast breaks. Then there is really rough good old fashioned beats TECHNO this is a sampler of things techno. Not interested yet? What I think of when I see a variety pack is what kind of place would sell this? Okay Im at the mall looking around and oh a music store should I want to see what they have or do they have almost everything HOT meaning that should sell a lot so lets put that in store. Wait what about like the stuff that people like but doesnt sound like every thing else that normal people who have no clue what techno is would buy put that in their store? ENTER CD BABY PEOPLE!!! Search and look what you like not what they think may sell a whole million copies or even in my case a few hundred or what ever right? Techno is now becoming just like every thing else where they only stock what they know will sell. I promise you this. Go to a few record stores and basically all you will see are names that buyers trust I dont know what kind of person buys techno I dont think you can really say there are nerds geeks freaks who buy all kinds of way cool music. The final straw is how many bulletin boards have you got and how many fan websites are there under your name and who are you dating not in the world of techno folks so thats one reason why I have always liked dance music or even experimental music. Its fun there arent any rules unless you either want to make people groove or if you want to make them explode all I can say is on this disc is exploding and grooving just for you . My name is Chris Brown.
