A touch of Celtic rhythm and soulful jazz move through richly original progressive folk tunes, bringing anthems your heart remembers, and longs to sing. 12 MP3 Songs FOLK: Modern Folk, EASY LISTENING: Love Songs Details: To: The Sweet Mystical Muse: "Your songs write me, and I am grateful!" And I am thankful that She guided me to the guitar as a teen, to the bass in college, sparked that desire to sing (and play my instrument) at the same time, and led me to others who loved to do the same acoustically. She helped me find and form groups over the last 25 years who have opened for Doc and Merle Watson, Bonnie Raitt, Emmy Lou Harris, David Wilcox, and Malcolm Holcombe. Over the last dozen years She has sent me well over a hundred songs, ranging from folk, country, bluegrass, jazz, celtic, and a touch of R+B, and helped me (along with The One above, and our Mother here), to create the CD "Medicine Moon". The songs continue to write me, now with the "Pilgrim" CD, and I am continually grateful.
