Classic rock and soft rock. 14 MP3 Songs EASY LISTENING: Soft Rock, ROCK: Soft Rock Details: Dear Friends, It has been three years since our last CD. One of the exciting things that has taken place in the interim has been the incredible growth in instrumental maturity. Kurt has taken up the bass guitar after years of being solely and simply the smoothest vocalist I've ever worked with. He plays all but one track and is getting very comfortable with playing and singing live. Ken's work on the keyboards amazes me for a guy that has never had a music lesson and has only been playing a little over three years. The growth of this part of our sound has allowed me, the guitarist/arranger to be more creative with the songs and my instrument as well. This CD title reflects that freedom that is blooming in our performance as well as our song writing. Kurt's new original's "Lucky Seven" and "Take Another Look" have been contracted to one of the premier country publishing companies. Arranging and recording our own tunes is always exciting. Also included is a re-mix of "Miss You More" one of my songs that has gotten a lot of attention as well. You're gonna like this one, turn up the volume and enjoy.
