It's too cold in the Arctic for spiders, right? Well, maybe not! This book introduces young readers to wolf spiders, the spiders with a very wide range! Students will learn about wolf spiders' sizes, behaviors, habits, dietary needs, methods of defense, anatomy, and color. Reproduction and spiderling development are also introduced. A diagram of a spider's body aids readers in identifying anatomical features. Threats to the spiders and their habitat including predators and humans are covered. Readers will also learn about the many types of shelters wolf spiders build. A distribution map shows where the spiders are found, so the young arachnologist can be on the lookout for a specimen to observe. For the less adventurous, full-color photos allow close observation from the comfort of the library! Glossary words in bold, phonetic spellings, and an index supplement easy-to-read text. These books are ideal for research reports and general reading. Checkerboard Library is an imprint of ABDO Publishing Company. Author: Britton, Tamara L.
