I've bundled these powerful videos into a product called 29 Easy & Instant Web Design Tricks: These twenty-nine videos come to a total playing time of one-hundred and thirty-two (132) minutes. Here's a quick run down of exactly what you get: Video One (6 Minutes) In this video you'll discover how to highlight text on your site to bring more attention to it. This is a tactic which I often use and it works an absolute treat. Video Two (11 Minutes) Here I'll reveal a very little known tactic for making your popup links work in ALL circumstances. Very few people know this, but by not using it you're potentially losing sales especially as more and more people have popup blockers these days. Video Three (4 Minutes) In this video I'll talk you through how to give your images more context which also has the benefit of potentially giving your pages more of a boost in the search engines. Video Four (2 Minutes) Here I'll show you how to use the little-used "title" feature to make your links more likely to be clicked (this also helps you with your search engine rankings). Video Five (4 Minutes) In this video I'll talk you through how to use the simple but extremely powerful "non breaking space" feature. Video Six (2 Minutes) Here I'll talk you through how to add a "strikethrough" to your text. Video Seven (2 Minutes) In this video I'll show you how to space out your bulleted and numbered lists so that they're easier to read. Video Eight (4 Minutes) Here I'll talk you through a very useful feature that most people don't use: Sub lists - how to nest multiple bulleted and numbered lists one within the other. Video Nine (10 Minutes) In this video I'll talk you through a powerful yet under-used feature - how to apply advanced visual formatting to buttons (multiple backgrounds, border styles...). Video Ten (4 Minutes) Here I'll show you the quick and easy way to set up an instantly redirecting web page. Video Eleven (3 Minutes) In this video I'll show you how to underline text. Video Twelve (6 Minutes) Here I'll talk you through a very useful little trick: how to set the font for the entire page with just four lines of code. This tactic helps your pages look great, and also helps them load considerably faster. This is pretty advanced and you may not find many uses for this, but I've used it several times and find it very, very useful. This is the first time I've shared it anywhere. Video Twenty-One (3 Minutes) In this video I'll show you how to add checkboxes to your pages and how you can use them as a sales tactic.
