

# Differential Equations, Chaos And Variational Problems

[DOWNLOAD HERE](#)

1;Contents;6 2;Editorial Introduction;9 3;Nodal and Multiple Constant Sign Solution for Equations with the  $p$ -Laplacian;14 4;A Young Measures Approach to Averaging;28 5;Viability Kernels and Capture Basins for Analyzing the Dynamic Behavior: Lorenz Attractors, Julia Sets, and Hutchinson's Maps;42 6;Generalized Steiner Selections Applied to Standard Problems of Set-Valued Numerical Analysis;61 7;On the Euler-Lagrange Equation for a Variational Problem;73 8;Singular Limits for Impulsive Lagrangian Systems with Dissipative Sources;90 9;Lipschitz Continuity of Optimal Trajectories in Deterministic Optimal Control;115 10;An Overview on Existence of Vector Minimizers for Almost Convex 1-dim Integrals;127 11;Strict Convexity, Comparison Results and Existence of Solutions to Variational Problems;133 12;Necessary Optimality Conditions for Discrete Delay Inclusions;144 13;Necessary Conditions in Optimal Control and in the Calculus of Variations;152 14;Almost Periodicity in Functional Equations;166 15;Age-dependent Population Dynamics with the Delayed Argument;173 16;Chaos in the Strmer Problem;183 17;Hausdor. Dimension versus Smoothness;203 18;On Bounded Trajectories for Some Non-Autonomous Systems;218 19;On Generalized Differential Quotients and Viability;230 20;Nonlinear Prediction in Riverflow the Paiva River Case;237 21;Shadowing in Higher Dimensions;247 22;Boundary Value Problems for Nonlinear Perturbations of Singular  $f$ -Laplacians;253 23;Existence, Nonexistence and Multiplicity Results for Some Beam Equations;263 24;Reducing a Differential Game to a Pair of Optimal Control Problems;274 25;Optimal Control of Nonconvex Differential Inclusions;289 26;On Chaos of a Cubic  $p$ -adic Dynamical System;308 27;Some New Concepts of Dimension;319 28;Degree Theory and Almost Periodic Problems;347 29;L-Energy Method, Basic Tools and Usage;359 30;On the Singular Set of Certain Potential Operators in Hilbert Spaces;379 31;Shape and Conley Index of Attractors and Isolated Invariant Sets;394 32;Regularity of Solutions for the Autonomous Integrals of the Calculus of Variations;408 33;Multi-modal Periodic Trajectories in Fermi Pasta Ulam Chains;416 34;Control of Transient Chaos Using Safe Sets in Simple Dynamical Systems;426 EAN/ISBN : 9783764384821 Publisher(s): Springer, Berlin, Birkhuser Discussed keywords: Differenzialgleichungen Format: ePub/PDF Author(s): Staicu, Vasile
