Relaxing and beautiful New Age piano with classical influence. Both very original AND familiar. Completely improvised, yet organized and comfortable sounding. New sounds out of traditional harmonies. Moving, Inspiring, Transporting. 11 MP3 Songs NEW AGE: New Age, EASY LISTENING: Background Music Details: Lots of CD descriptions SAY they are beautiful and relaxing. This one IS. Some people play it all the time as a calming influence to their lives. One restaurant owner used only this CD as background because it didn't distract their customers, but instead made the environment calm and pleasant. But don't be fooled by the word "Background". This is no nebulous, aimless, oversimplistic, or hypnotic experience. It has real and original melodies that stay with you as continuing mood enhancers (with no chemical side effects!) You can chose to intently listen in detail to unexpected changes and evolutions of sound or just sit back and let the music flow over you. It turns on the gentle smile, it takes you away to another place. It's moving. When one feels inspired, one separates from and is lifted out of undesirable states of mind. Hey, it could happen to you with this music. More of your true self is able to emerge as you relax. "There's a great deal of potential in a fine Yamaha six foot grand. I love to dig into the keys and find new ways of mixing sounds, creating beauty."
