

Mp3 Sonar Eclipse - Trance Crypton

[DOWNLOAD HERE](#)

A blend of dance beats rich with unique Trance and Techno themes. 10 MP3 Songs ELECTRONIC: Techno, ELECTRONIC: Trance Details: Hi I am Dan from sonar Eclipse. I am the producer and primary composer for the group. The group consists of Me and two of my brothers, Steve Hopkins (keyboards) and Adam Hopkins (hmmm adviser and vocals [for the next CD - this one is instrumental]). I have always wanted to do music, in fact I was planning to do music composition and singing as a career after High School, but instead ended up as a computer programmer (how did that happen??). I am excited to release my first album. Now about the album, the only reason you are reading: This album features a variety of different themes, for instance River Trance (yes it is meant to make you think of River Dance) is a Nordic/Celtic techno song combining the old world with the new world in dance music (it also has some tribal flare in it). Also one of my favorites is a Motown theme dance song titled DanceTown. I have another track (Necrotrancer) that is a slower tempo techno song with a spooky or eerie theme to it. I could go on, or you could just buy the album and find out =) I know you will enjoy this Trance Crypton.
