Acoustic traditional progressive folk in the Pentangle and Waterson Family style. Double guitars, fiddle, vocal harmonies. 13 MP3 Songs in this album (51:18) ! Related styles: FOLK: Celtic Folk, FOLK: Folk-Rock People who are interested in Steeleye Span The Watsons The Pentangle should consider this download. Details: Two young Bay Area folkies got together in the early 1990's and began writing, composing and playing music together. They loved the traditional sounds of England, Ireland and the Appalachians and found themselves experimenting with new ways of presenting that music. A couple years later they put out a CD of their discoveries. That CD has sat in Steve's garage for over a decade. Now the due is finally getting it together to put their music online. Valerie and Steve are progressive traditionalist musicians, loving the old songs and tunes but equally loving all the funky things that folks like Pentangle and Steeleye Span did to that music. Lots of originals on this album, though you will probably have a hard time telling what's original from what's trad. They write like the old folks did. Perhaps after you hear a few cuts you'll wonder why these guys never got famous. Well, one reason (oh, and also it's really hard to get famous nowadays) is that they both had day jobs, lives outside music, and loads of other interests. They never took their show on the road, never pushed the CD on DJs, never even put their music up on iTunes, until now, 2007. So if you haven't heard of them join the club. But if you like their music and if you'd like to help clean out Steve's garage, buy one of the 1000 CDs printed. Unless a miracle happens, they won't be printing any more. But most important of all, give the music a listen. We think you might enjoy it.
