Dear Professional Marketer, One of the beauties of having your own Digital Products is obviously making the sale instantly rather than having to wait for someone else to pay you your affiliate checks, and only a petty fraction of the product price to boot. And as long as you're the seller of your own product, you own the resell rights and in a real essence, you have the license to decide your own profit potential. Which is perfect, of course, since you can also brand yourself in the process by customizing the sales page and adding back-end offers on the download page. And Here Are Even More Reasons Why You Should Have Your Own Digital Products To Sell... You can spawn more than one cash point of your choice from your Master Resale Rights Licensed Products, such as One Time Offers, back-end offers, and list building opt-in forms after the initial purchase, Since you own the Master rights to your Products(s), you can offer a "user only" version and either charge a lower price to those who can't afford a bigger investment, or even give it away as a

"cookie bite" and build your opt-in mailing list, You can also offer your product in your own paid membership site or as a bonus to another product you are selling, You can also earn more by selling the Resell Rights to your product, And so much more! Your imagination is essentialy, the limit. All in all, owning your own Product or line of Products is one of the best choices you can ever make in your Internet Marketing career. But There's A Problem... ... and it's called product development or product creation. However, believe me: selling your own Digital Products is too lucrative to be passed on just because of this barrier. So let's evaluate your best option possible: Solution #1: Write Your Own E-Books and Software Code Often times, creating your own Product demands a lot of writing and/or coding skill, expertise, niche marketing research, and incredible knowledge on your part. And if you don't have any flair or time for writing & coding or you absolutely hate it, you will do well to leave this option out. Solution #2: Hire Ghostwriters & Programmers Some call this the "secret weapon" of gurus. Engaging ghostwriters and software coders can be one of your best choices... only if you can afford it. And if you don't have at least a few hundred dollars to trust someone else to do the writing & coding for you, you will have to leave this option out, too.
