

# Create Mobile Optimized Sites Using Google Sites

[DOWNLOAD HERE](#)

The way people are searching the internet is changing. You need to be ready for this. Fortunately you can do it for free, and I am going to show you how!. In this video series I took one of my sites and made a mobile optimized version of it. Watch this video to have a look. By the year 2013 more people will be accessing the internet from their mobile phones than from their desktop or laptop PC. Worldwide sales of smart devices will also reach nearly half a billion units per year. This is backed up by solid research. Do you think you can ignore this? I certainly hope not, because you really can not. The numbers are just to huge. Fortunately you can be on the front end of this trend, and it wont cost you a dime. You can set it all up on Google sites. You can make a very professional looking mobile site that is fully customizable. Look again at the video above. I created a site that is very similar in design to my original site. I have even included the scripts you need to make your mobile site appear automatically on mobile phones! Here is just some of what you will learn: How to use Google site templates How to customize your site How to make your mobile site appear on your own subdomain How to automatically route mobile devices to the mobile site. and lots more... This video series is going to show you everything you need to know about

setting up your own mobile website. Dont wait - grab your copy now!
