

# From X-ray Binaries To Quasars

[DOWNLOAD HERE](#)

R. FENDER, T. BELLONI and E. GALLO / A Unified Model for Black Hole X-Ray Binary Jets? - S. HEINZ, A. MERLONI, T. DI MATTEO and R. SUNYAEV / On the Relationship Between the Jets from X-Ray Binaries and AGN - A. CELOTTI / A Transition in the Accretion Properties of AGN - L. MALZAC, A. MERLONI and A.C. FABIAN / Jet-Disc Coupling in the Accreting Black Hole XTE J1118+480 - A.P. MARSCHER / Are 3C 120 and Other Active Galactic Nuclei Overweight Microquasars? - A. MERLONI, S. HEINZ and T. DI MATTEO / A Fundamental Plane of Black Hole Activity: Pushing Forward the Unification Scheme - D.L. MEIER / Magnetically Dominated Accretion Flows (MDAFS) and Jet Production in the Lowhard State - J.C. LEE / Black Hole Systems Seen at High Spectral Resolution: Inflow and Outflow - C.S. REYNOLDS, L.W. BRENNEMAN and D. GAROFALO / Black Hole Spin in AGN and GBHCs - R.L.C. STARLING, M.J. PAGE, G. BRANDUARDI-RAYMONT, A.A. BREEVELD, R. SORIA and K. WU / The Seyfert-Liner Galaxy NGC7213: An XMM-Newton Observation - K. BECKWITH and C. DONE / Observational Effects of Strong Gravity - A.C. FABIAN / Broad Iron Lines in AGN and X-Ray Binaries - J. HOMAN and T. BELLONI / The Evolution of Black Hole States- S. VAUGHAN, A.C. FABIAN and K. IWASAWA / Rapid X-Ray Variability of Seyfert 1 Galaxies - M.A. ABRAMOWICZ and W. KLUZNIAK / Epicyclic Frequencies Derived from the Effective Potential: Simple and Practical Formulae - K.M. LEIGHLY / X-Ray Periodicity in AGN - W. KLUZNIAK and M.A. ABRAMOWICZ / Resonant Oscillations of Accretion Flow and kHz QPOs - M. VAN DER KLIS / Comparing Black Hole and Neutron Star Variability - M. NOWAK / X-Ray and Radio Monitoring of GX 339-4 and CYG X-1 - C. DONE and M. GIERLINSKI / Accretion in Strong Gravity: From Galactic to Supermassive Black Holes - R. NARAYAN / Low-Luminosity Accretion in Black Hole X-Ray Binaries and Active Galactic Nuclei- S. MARKOFF / Exploring the Jet/Accretion Flow Relationship in Low Disk Luminosity Sources - S. MIGLIARI and R. FENDER / What Can We Learn from Neutron Star X-Ray Binaries Jets? - H. KRADING and H. FALCKE / A Unifying Scheme for Low-Luminosity XRBs and AGN - L.C. HO / "Low-State" Black Hole Accretion in Nearby Galaxies - J.M. MILLER / Present Evidence for Intermediate Mass Black Holes in ULXs and Future Prospects - T.J. MACCARONE, R.P. FENDER and A.K. TZIOUMIS / Finding Faint Intermediate-Mass

Black Holes in the Radio Band - S.F. PORTEGIES ZWART, J. DEWI and T. MACCARONE / Formation and Evolution of Intermediate Mass Black Hole X-Ray Binaries - F. AHARONIAN and A. NERONOV / TeV Gamma Rays from the Galactic Center Direct and Indirect Links to the Massive Black Hole in Sgr A - J.M. PAREDES / AGNs and Microquasars as High-Energy gamma-Ray Sources - S. CORBEL / Large Scale Jets in Microquasars - C.R. KAISER, J.L. SOKOLOSKI, K.F. GUNN and C. BROCKSOPP / Is GRS 1915+105 a Microquasar? EAN/ISBN : 9781402040856 Publisher(s): Springer Netherlands Format: ePub/PDF Author(s): Maccarone, Thomas J. - Fender, R. P. - Ho, L. C.
