

# Mp3 Abstract Audio Systems - Poems For Innogen

[DOWNLOAD HERE](#)

Eight melodic pieces incorporating ambient, drone, and organic sounds. 8 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Experimental Details: The human mind is a fascinating thing. We are capable of imagining a boundless universe, infinite in size as well as its opposite, the infinitesimal domain of the atom. While not as all encompassing as this, Poems For Innogen attempts to present a similar idea. Heavily electronic tracks like Circumstellar and Full Of Stars look out into the vastness of space, while acoustic pieces like Flower and Vine and Dulcinea present a more intimate, individual experience. Some of the tracks, particularly The Dandelion Clock, attempt to incorporate both ideas, embellishing a warm, muted piano line with distant drones. You will find elements of ambient and drone in these compositions, as well as acoustic and improvisational work. While simultaneously outward and inward looking, it is my hope that the music presented herein will somehow strike a balance between the two.
