Details: Singer/songwriter Anna Maria Menotti is a nine year old girl with typical fourth grade dreams and problems. Her exuberance is captured in her music, which is best defined as extremely infectious, hummable and fun pop songs with a rock edge. Anna began singing before she could even speak and has been studying voice since age 6. She sings all of her own back-up vocals and harmonies. She is also an accomplished pianist and a beginning trombonist and bassist. Annas influences range from Rogers and Hammerstein to My Chemical Romance. Although Annas life has always centered around music, she has many other interests as well. She has acted in several plays beginning with a part in Annie at age 5. She explored various types of dance before choosing flamenco as her favorite. Anna has also done occasional modeling work. Between practices, rehearsals and her studies, she still finds time to just be a kid. Anna loves to swim, play with friends, read, ride her bike, go to the beach and amusement parks. Anna lives in Los Angeles, California with her mom, dad and younger brother. Tags: pop
