A recipe of British acoustic rock mixed with Hornsbyesque country herbs , a hint of nostalgia,served liberally with keyboards,guitars and Beach boy vocals 14 MP3 Songs POP: British Pop, COUNTRY: Country Rock Details: All music is poetry , and all poems communicate a story. Seize the night is an album with which you will identify because the thoughts and feelings it provokes are uniquely personal ,memorable, and reassuringly human . Here are just a few examples ; Do you believe in predestination? Track 1, Red Cells grew from an eerie yet stimulating true life experience of this phenomenon, expressed in the most lyrical form. Recognition of the power of expression and storytelling is a feature of Track 5 , Song for Daphne , an unashamed tribute to a favourite author , Daphne du Maurier. If you've never read her books, this track will launch you on a voyage of discovery, but if you have already experienced some of her writing, this will leave you yearning for more. Should you wish to escape in an open top convertible and drive through Big Sur with your fantasy partner , then you should be playing tracks 3 and 6, Fly Away and Let's Just disappear. If art and artists fascinate you , then the question posed by track 10, Self Portraits , is one you will enjoy contemplating. And all this comes wrapped up in melodies to make your heart race , your body sigh , and (maybe) bring a tear to either eye!
