

Androgen Action In Prostate Cancer

[DOWNLOAD HERE](#)

Androgens are critical regulators of prostate differentiation and function, as well as prostate cancer growth and survival. Therefore, androgen ablation is the preferred systemic treatment for disseminated prostate cancer. Androgen action is exerted in target tissues via binding the androgen receptor (AR), a nuclear receptor transcription factor. EAN/ISBN : 9780387691794 Publisher(s): Springer, Berlin, Springer, New York Discussed keywords: Prostatakrebs Format: ePub/PDF Author(s): Tindall, Donald - Mohler, James
