Double Decker London Bus Upstairs Atmos (sfx Sound Effect)

DOWNLOAD HERE

This file was recorded on the upper deck of a London night bus. There is much chatter towards the start of the file and it becomes more subdued towards the end. The route announcer is audible, as are the footsteps of people walking up and down the stairs. All files on sale by Sevenleaf SFX have been recorded by professionals and are available for you to download as 16 bit 48kHz stereo wav files. Previews are low quality mp3 files with security watermark beeps. Purchased files are broadcast quality wavs without watermarking.
