Details: LSA is a producer and musician who started making music about 12 years ago. It all began when she attended college for recording arts and graduated with a degree in sound engineering. There she began to experiment with producing and soon discovered the passion in creating music. This enthusiasm led to the founding of the hip hop group called children of the fog. Writing and producing hip hop became a great learning opportunity. The music and culture is a strong force in her life. Some of her influences include DJ Shadow, Portishead, Rakim, Wu-tang, Aphextwin, Bob Marley, Paul Oakenfold, Moby, large amounts of underground trance and hip-hop. Because of these influences her music has many diverse elements. Currently she is working on an album entitled "BitzandPieces". It will be the second major release on IIElements. She is also keeping busy producing music for other artists.
