Melodic power pop with hooks and harmonies with chiming and ringing guitars. 12 MP3 Songs POP: Beatles-pop, POP: 60's Pop Details: In the finest pop-rock spirit for melodic pop mavens. Beatle inspired songs that are hook filled gems. Future releases from this proficient tunesmith should be of great interest for pop-rock fans. Mark Bialczak Music Critic Post -Standard Syracuse ,NY From a melodic point of view, the early 70's pop legend Badfinger comes to mind on several tracks, and sure enough ,Tim Anthony cites greats like John Lennon,Pete Ham,Eric Carmen and The Rubinoos among his major pop influences.Anthony's Beatle inspired singing and songwriting is well evident on this disc.Every song here contains a strong memorable hook,while Tim's masterful,self contained accompaniment on almost every instrument is quite impressive. Although the disc was recorded on a modest budget the sound is of big label quality.I am voting for this cd as one of the top 10 cd's released during the 90's.
