"An amazing new report shows you the secrets behind successful mini sites!" Yours for only \$25.95 - A deep down dissection of the most successful mini sites on the web and exclusive access to my 9-block formula for creating killer mini sites that sell like crazy! (Plus you get the complete rights to sell this great product and keep 100 of the profits in your pocket! Dear internet friend... I'm already taking heat from some "web marketing gurus" for revealing this information here. But you know what? I don't care! Their secrets have been hidden long enough and in my opinion it is about time that someone actually showed *you* the exact steps to create a mini-site that makes mega-bucks... sites like the ones those gurus are using to build their online empires every passing day. In case you're still not familiar with mini-sites, let me give you a brief explanation of what they are and what they can do for you... An insider-look at mini-sites: Mini Sites are simple (but powerful) one or two page web sites that sell a product -- usually, an infoproduct. These apparently harmless sites, when done correctly are unstoppable money-making machines. If you've been on the net some time and if you're interested in the topic of "online marketing", I'm sure that you've seen some of the sites I'm talking about... and chances are you even bought from

several of them. Right? Yes, that's how powerful they are... Actually, mini-sites are in my opinion "the perfect web business". And how couldn't it be if... * Mini-sites are quick and easy to produce * Mini-sites allow you to test your marketing on the go * Mini-sites provide instant results * Mini-sites have *huge* response-rates The fact is that if you're still not embracing the power of mini-sites to sell your products online, you might as well quit the online marketing race altogether and flush your money down the toilet! But be warned: Slapping up a one-page site and hoping to make a zillion dollars in sales is not all it takes.
