electronica. treated guitars 5 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Electronica Details: "ARCSIN: Turn It Off and Go to Bed (CD on Ethedrone Muzac) This release from 2002 features 17 minutes of delightful electronic music. Track 1: Lively electronics spring forth peppered with pleasant e-perc. A ricochet quality abounds, and treated guitars waver into view, injecting a haunting quality that is remarkably enticing. Track 2: Murkier electronics cavort in tandem with conventionally generated percussion. The music descends to a quantum level to examine microscopic particles amid a pulsating ambience. Track 3: Sparse beats and grinding moods collide with lush instrumentation, accomplishing a rewarding excursion into a futurist urban setting defined by a hesitant quasi-techno delineation that mutates into robotic pop. Track 4: Crackling diodes lead to a pensive passage of sashaying tonalities goaded along by somber e-perc. Track 5: Abrasive beats and orchestral deliberations escort the audience into retreat from the real world, preparing the listener for dreamland. Highly recommended for those looking for new sonic thrills." sonic curiosity soniccuriosity.com/sc189.htm
