

Mp3 Deejaymori Nyc - Flight Audacity Of Dreams

[DOWNLOAD HERE](#)

When eastern melodies meet progressive Euro techno, house and groove beats. Dance, ambient, world fusion and beat. 11 MP3 Songs ELECTRONIC: Dance, ELECTRONIC: Ambient Details: Im a NYC based deejay making international, ambient and dance music in electronic music space, as well as mixing and remixing music. I also have entered the arena of electronic music making for commercials, short films and other venues. Flight - Audacity of Dreams is my second full length album created and composed by me. Like my first album Memento, Flight manifests my love for eastern melodies, progressive house and Euro techno beats as well as West African drums. In this album I have used up to 45 different beats and melodies in each track as well as introducing eastern vocals to create a special experience and to take the listeners to a dream like journey. Track 4 is my tribute to the late Persian poet Nima Youshij. The voice on this track is of the late Persian poet SHAMLO. The poem conveys the message of hope amid despair. Track 9 is my tribute to the young and talented Persian poet MARYAM HEDARZADEH. The voice in this track is of the poet herself. The poem is about a lover expressing and confessing her love in a very sincere way. Track 11 is the total remixes of the song Bezan Bereem by very popular Persian Pop artists MANSOR who works and lives in Los Angeles. Because of my belief that music has no borders and boundaries, by remixing this song, Im trying to prove that artists whose lyrics are not in English have as much a chance to be successful in the main stream as the ones who sing in English. So if you are a DJ, make sure you use this song at your gigs and see peoples reactions. With so much pain suffering in the world, I try, even if is only for a few minutes, to bring joy and happiness to my listeners and help them to celebrate and appreciate this very moment. Thanks much for buying this album and make sure you send me your reviews. Cheers, deejaymori
