***** The Global Intelligencer Music review August 2007

Through the Clouds by Emergence Music 2007 produced by David McCarthy 5 cuts (63:47) A complex mixture of vocals, flutes, synthesized instrumentals, Native American chants and drumming, accented by elegantly hard rocking yet spacey electric guitar courtesy of John Paulus formerly of Canned Heat, "Through the Clouds" is by far McCarthy's most developed musical production yet. Often gentle and wistfully melodic, for the most part this CD has a beat and drive that is both primal and heartfelt; its sensual heat evokes auras of tribal journeys from the Great Plains of Amerindia to depths of the Amazon jungle. Intense and multi-layered, Through the Clouds takes you to some unexpected places. link.. theglobalintelligencer.com/aug2007/arts
