"High Maintenance" may be the title of Leslie's debut-album (produced by award-winning Bill Green), but this Texas artist's sound has been described as soulfully sweet with a sparkle of pure country rhinestones. Anticipation of this album has been a long-time coming and now that it is finally here no Texas borders will keep her contained. She plans on taking the Lone Star State by storm and can't wait any longer to share her love of music to the Texas world and on. Don't get confused, just because this girl reigns from Texas, you will not hear lyrics of beer runs, whiskey trips, and curse words coming from her mouth. Leslie has a following of all ages and wants to make sure she is a great role model for young girls, encouraging them to follow their dreams as they come and not to get discouraged by society's standards. The Texas music world is definitely dominated by males, but this is not discouraging to this energetic, head-strong, and hard-working girl. With influences ranging from Patsy Cline to Dolly Parton to Lee Ann Womack she has seen women turn into icons in the country music world. Leslie has chosen a time to embark in the music world where country music needs a girl from Texas to show them what they are missing, their "entire package" has arrived on the doorstep, with the ink red stamp "High Maintenance."
