Experimental-instrumental day-dream music. An hypnotic fusion of funk-rock, dark ambient, low-fi electronic music, you'll travel through as a journey in a foreign country, or just another planet. 9 MP3 Songs ELECTRONIC: Ambient, ELECTRONIC: Experimental Details: "Rebellion!" was born a long time ago. At the beginning, there was no concept or big ideas. Just musical interpretation of thoughts and feelings. "Rebellion!" is the result of a 3 year session , in which about twenty tracks have been recorded at my home studio , here in Israel. After a thousand doubts and changes, I finally put 9 tracks together, and started to develop some new perceptions about it. My objective was to try to take the listener as far as I could. Describe him a long journey through the sounds, as in a movie. This album is my third. After two very personal discs, I am glad to share another part of my expression as a musician. This album is an instrumental experiment combine with a rocky beat, I am still preserving no matter what. That's about it. Enjoy.
