

Iutam Symposium On Turbulence In The Atmosphere And Oceans

[DOWNLOAD HERE](#)

Part I Waves and Imbalance: On spontaneous imbalance and ocean turbulence: generalizations of the Paparella Young epsilon theorem, by Michael E. McIntyre; Inertia-gravity-wave generation: a geometric-optics approach, by J. M. Aspden and J. Vanneste; Parallels between stratification and rotation in hydrodynamics, and between both of them and external magnetic field in magnetohydrodynamics, with applications to nonlinear waves, by S. Medvedev and V. Zeitlin; Generation of an internal tide by surface tide/eddy resonant interactions, by M.-P. Lelong and E. Kunze; Generation of harmonics and sub-harmonics from an internal tide in a uniformly stratified fluid: numerical and laboratory experiments, by Ivane Pairaud, Chantal Staquet, Jol Sommeria and Mahdi M. Mahdizadeh; Deep ocean mixing by near-inertial waves, by Victor I. Shrira and William A. Townsend; Part II Turbulence and Convection: Eddies and Circulation: Lessons from Oceans and the GFD Lab, by Peter B. Rhines; Observations on Rapidly Rotating Turbulence, by P A Davidson, P J Staplehurst and S B Dalziel; Equilibration of Inertial Instability in Rotating Flow, by Daan D.J.A. van Sommeren, George F. Carnevale, Rudolf C. Kloosterziel and Paolo Orlandi; Quasigeostrophic and stratified turbulence in the atmosphere, by Peter Bartello; A Perspective on Submesoscale Geophysical Turbulence, by James C. McWilliams; Spectra and Distribution Functions of Stably Stratified Turbulence, by Jackson R. Herring & Yoshifumi Kimura; Modeling mixing in two-dimensional turbulence and stratified fluids, by Antoine Venaille and Joel Sommeria; The solar tachocline: a study in stably stratified MHD turbulence, by Steven Tobias; Some Unusual Properties of Turbulent Convection and Dynamos in Rotating Spherical Shells, by F. H. Busse and R. D. Simitev; Part III Instability and Vortex Dynamics: Zigzag instability of the Krmn vortex street in stratified and rotating fluids , by Axel Deloncle, Paul Billant and Jean-Marc Chomaz; Instabilities of a columnar vortex in a stratified fluid, by Patrice Meunier, Nicolas Boulanger, Xavier Riedinger and Stephane LeDizes; Geostrophic vortex alignment in external shear or strain, by Xavier Perrot, Xavier Carton, and Alan Guillou; Equilibrium States of Quasi-geostrophic Point Vortices, by T. Miyazaki, H. Kimura and S. Hoshij; Part IV Jets: Formation and Structure: The structure of zonal jets in shallow water

turbulence on the sphere, by R. K. Scott; Jet formation in decaying two-dimensional turbulence on a rotating Sphere, by Shigeo Yoden, Yoshi-Yuki Hayashi, Keiichi Ishioka, Yuji Kitamura, Seiya Nishizawa, Sin-ichi Takehiro, and Michio Yamada; Triple cascade behaviour in QG and drift turbulence and generation of zonal jets, by Sergey Nazarenko, Brenda Quinn; The HyperCASL algorithm, by David G. Dritschel and Jerome Fontane EAN/ISBN : 9789400703605 Publisher(s): Springer, Berlin, Springer Science & Business Media Format: ePub/PDF Author(s): Dritschel, David
