

Mp3 Dean - And So It Begins

[DOWNLOAD HERE](#)

A fusion of ACC electro, soul, rock, Latin, and jazz mixing ambient samples with live performances and solos. 9 MP3 Songs ELECTRONIC: Ambient, JAZZ: World Fusion Details: I have been in and around music all my life, I started out with a formal music education realized that wasn't for me so I tried different instruments ended up playing sax. Played in a few bands finally set up my own band we just started to take off but internal politics turned sour so I got some great guys together went into the studio cut a couple of cd's but it was too limiting so I decided to go it alone learned how to play guitar drums bass keyboards flute produce and write all the material myself and a couple of cd's and a steep learning curve later I have a product I feel I want to share. I mix acoustic and electro sounds with samples loops and live performances, I will mix programmed drums with live drums and percussion add ambient sound tracks to fuse latin and afro rhythms with rock jazz and soul. For me the only boundaries in music are our own imaginations. If you want to hear some of the tracks on the cd go to garageband you will find me under DEAN.D
