ROCK: Modern Rock, ROCK: Hard Rock Details: From the Fall's long-awaited debut album "Entropy" was released in late July 2005. It is a collection of mostly dark, thoughtful tunes that represents more a stream of consciousness than it does a book of poetry. From the Fall formed in October 2003 and in the space of about a month we conceived, composed and recorded a demo featuring four songs which we then went on to play at our first shows in Seattle. The next year or so was spent writing more songs and ironing out the little wrinkles in our live set. Now we have our album and the future is spread out before us.
