Background Music, SPIRITUAL: Inspirational Details: In her book, "Released to the Angels", Marilyn Garziona reveals the incredible journey she took with Patrick, her husband, through the progressive states of Alzheimer's. She shares with us the hidden "gifts" of Alzheimer's--remarkable moments of strength, beauty, and joy that give meaning to a world transformed by the pain of dementia. Music was an important part of their life together. When Patrick was restless, Marilyn would quietly play the piano as a means to calm and reassure him. The music of this CD reflects quiet melodies she composed for Patrick and background music created for her web site. It is an uplifting collection of soothing songs reminiscent of their time spent together and the inspirational message of her book. Visit Marilyn at:
