Piano music to relax to. Brings you to another place and time of surrender to that inner peace 14 MP3 Songs EASY LISTENING: Background Music, CLASSICAL: Contemporary Details: This CD captured and expression of joy and contentment I was having during the recording of these sessions. It has been a great experience being able to actually create and capture this music right here in this one-room boarding house I've been occupying for the last 17 years. My buddy @ "onewayoutrecords" (onewayoutrecords.com) just brings his equipment over here once a month and presses the record button and we pick out the Gems when the dust settles! Started playing music around 17-18 and I'm self taught, can't read music but here I am 48 years later. I make up my own songs mostly; some with Lyrics some not. But you can read more about me on my first CD release @ CDBABY.COM I pray you enjoy these songs as much as I did playing them..... Sam
