I'm a lifelong visual artist and will not dissappoint anyone who takes a close look. Started producing music when I was 15. Lost my mind when I was 21. Got locked up in a luny bin. went to hell. came back. built some stairs to the stars. Made a blessing out of a fucked up manic depressive bi-polar vietnam epic. I got alot to share, alot I fought, overcame and learned. Nowadays I'm maintainin and building, still learning and growing. I own a condo, got married in June '06 and hold down a practical career in landscaping. Meanwhile I keep production and flows movin in my lab, my keys in my pocket and foot in the door. The beats stay original flavor and bangin. The lyrics are diverse and sharp enough to make fresh razor blades look like a dull joke, that's real. support my work, it is valuable. Thank you for stopping by. northern california bay area representative, universal side..... shapeless
