

E-business And Telecommunication Networks

[DOWNLOAD HERE](#)

Preface. Conference Committee. Invited papers. Data mining techniques for security of web services; M. Malek and F. Harmantzis. Towards an alternative way of verifying proxy objects in jini; N. Papamichail and L. Vasiu. An experimental performance analysis study of loss rate and jitter characteristics in wireless networks; M. S. Obaidat and Yulian Wang. On the survivability of wdm optical networks; Y. Luo et al. Sigma: a transport layer mobility management scheme for terrestrial and space networks; S. Fu and M. Atiquzzaman. PART 1 - Global Communication Information Systems and Services. A decentralized location service: Applying P2P technology for picking replicas on replicated services; L. Bernardo and P. Pinto. E-macsc: a novel dynamic cache tuning technique to maintain the hit ratio prescribed by the user in internet applications; R.S.L. Wu et al. Efficient information retrieval from handheld terminals with wireless digital phone interface: personalized information access on mobile phones and PDAs; H. Weghorn. Secure web browsing over long-delay broadband networks: recommendations for web browsers; D. Dillon et al. Experimental based tool calibration used for assessing the quality of e-commerce systems; A. Stefani et al. Gender differences in online shoppers decision-making styles; C. Yang and C.C. Wu. Design and evaluation of the home network systems using the service oriented architecture; H. Igaki et al. PART 2 Security and reliability in information systems and networks. New non-adaptive distributed system-level diagnosis methods for computer networks; H. Masuyama and K. Watanabe. Gsm and gprs performance of ipsec data communication; G. Me et al. Practival auditability in trusted messaging systems; M. Reis et al. Towards an adaptive packet marking scheme for ip traceback; P. Yan and M.C. Lee. Baseline to help with network management; M.L. Proenca Jr. et al. Network-based intrusion detection systems evaluation through a short term experimental script; L.L. Fagundes and L.P. Gaspar. A single sign-on protocol for distributed web applications based on standard internet mechanisms; J. Gantner et al. PART 3 Wireless communication systems and networks. Adjacent channel interference: impact on the capacity of wcdma/fdd networks; D. Figueiredo et al. Care-of-prefix routing for moving networks in mobile ip network; T. Suzuki et al. Service integration between wireless systems: a core-level approach to internetworking; P. Pinto et al. Spur: a secured protocol for umts registration; M. Abdelkader

and N. Boudriga. Providing qos in 3g-wlan environment with rsvp and diffserv; E. Wallenius et al. Fast Mobile ipv6 approach for wireless lan based networks: link-layer triggering support for ieee 802.11; N. Jordan and A. Poropatich. Cdma2000 1x capacity decrease by power control error in high speed train environment; S. Shin et al. Ugsp: authentication based secure protocol for ad-hoc networks; N. Arora and R.K. Shyamasundar. PART 4 Multimedia signal processing. Image authentication using hierarchical semi-fragile watermarks; Y-L Tang and C.-H. Chen. Deployment of live-video services based on streaming technology over an hfc network; D. Melendi et al. Hardware-oriented analysis of the arithmetic coding comparative study of jpeg2000 and h.264/avc compression standards; G. Pastuszak. Audio watermarking quality evaluation; A.G. Acevedo. Compression of hyperspectral imagery via linear prediction; F. Rizzo et al. Bayer pattern compression by prediction errors; A. Buemi et al. Application level session hand-off management in a ubiquitous multimedia environment; L. Rong and I. Burnett. Author index. EAN/ISBN : 9781402047619 Publisher(s): Springer Netherlands Discussed keywords: E-Business, Telekommunikation Format: ePub/PDF Author(s): Ascenso, Joao - Vasiu, Luminita - Belo, Carlos
